

# How do we incorporate **Artificial Intelligence** effectively and cost-effectively into our business management?

We complement our business consulting services with

*Tailored*

AI  
Models

trained with your data, internal policies, rules, parameters and regulations to support analysis and decision-making at the strategic and operational level.

Applications and Use Cases in:

**BANKING & FINANCE | FMCG – MASS CONSUMPTION | LEGAL SERVICES | MANUFACTURING | RISK MANAGEMENT | LOGISTICS SERVICES | INSURANCE | PHARMA & HEALTH SERVICES | RETAIL | AGRICULTURAL INDUSTRY**

There are 3 options for implementing your AI strategy; We offer the most meaningful one.

Option - I

### Pre-Configured AIs

(Supplied by: IBM, Microsoft, Oracle, Salesforce, etc.)

#### Challenge:

No AI can successfully solve a business problem in the absence of experts to build or customize it with your data.... **Context is everything in AI**

Option - III

### Build your custom-trained and tailored model with TheDiscoveryAI

The Discovery AI team creates and personalizes AI for you from your data with minimal operational investment.

**Your Data + Secure and Private Environment + Continuous Model Updates to Keep Evolving!!**

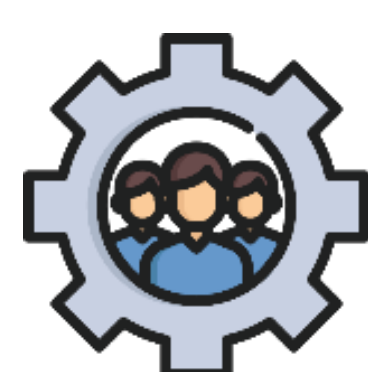

Option - II

### Develop your own AI

(Developed by: Your team)

#### Challenge:

More expensive, higher investment, longer time-to-production due to the learning curve, and most of all.... **Don't you lose your focus on the core business and other priorities?**
